Summary

I am a Fullstack Developer with a degree in Análise de Sistemas de Computação from FIAP, one of the leading institutions in technology education in Brazil. I have a passion for creating innovative and user-friendly web applications using the latest technologies and frameworks.

Currently, I work as a Desenvolvedor De Software .NET at koode, a digital agency that provides web development, design, and marketing solutions for various clients. I am responsible for developing, testing, and maintaining web applications using Asp.Net, C#, JavaScript, SQL Server. I also use Model-View-Controller (MVC), and Entity Framework (EF) Core as my core competencies. In my role, I collaborate with other developers, designers, and project managers to deliver high-quality products that meet the client's expectations and needs..

I am always eager to learn new skills and technologies, and I have obtained multiple certifications in C#, Excel, and web prototyping. I also have a GitHub profile where I showcase some of my personal and academic projects. My goal is to become a senior developer and a leader in my field, and I am looking for new opportunities and challenges that will help me grow and improve as a professional.

Experience

Desenvolvedor De Software .NET

koode

Sep 2022 - Present (1 year)

I work as a software developer at Koode, where I mainly work with Web Forms. My role involves collaborating in the development, maintenance, and enhancement of systems using Web Forms technology to create web interfaces.

I participate in development projects, working as part of a team to deliver efficient and functional software solutions. I continuously acquire knowledge in web development and deepen my skills in using Web Forms technology to meet the company's business requirements.

I work in a hybrid environment, combining in-person work with the option of remote activities, ensuring effective communication with the team and colleagues.

Desenvolvedor de software júnior

Empresa de desenvolvimento de software confidencial

Jun 2020 - May 2022 (2 years)

I worked as a junior software developer, contributing to the development of systems using Next.js, C#, Redis, MongoDB, and TypeScript. I collaborated with a team of developers to deliver high-quality software solutions.

I participated in the design, coding, testing, and debugging of software applications. I also assisted in implementing new features and maintaining existing code.

Through this experience, I gained expertise in using various technologies to build efficient and scalable applications.

Estagiário de desenvolvimento

Nova Futura Investimentos

Feb 2020 - Jul 2020 (6 months)

I worked as a software development intern at Nova Futura Investimentos, where I gained practical experience in backend-focused software development projects using C# and SQL Server.

I collaborated with the development team in creating and enhancing financial systems and tools, utilizing technologies such as C# and SQL Server for data manipulation and management.

I actively participated in backend projects, contributing to the improvement of the company's internal systems' efficiency.

Working in an agile environment, I attended team meetings, code reviews, and project planning sessions.

During my time at Nova Futura, I had the opportunity to learn from experienced professionals in the development field, acquiring valuable knowledge for my career in technology and finance.

Education

FIAP

Análise e desenvolvimento de sistemas, Análise de Sistemas de Computação

Jan 2020 - Dec 2021

Universidade Anhembi Morumbi

aluno, Gestão de Sistemas de Informação

2019 - 2020

Licenses & Certifications
